EMPLOYMENT HISTORY

Lead Software Engineer, Bits In Glass Consulting October 2019 – present
[Remote Position]

- Evaluate client requirements and collaborate with teammates to design an appropriate solution.
- Participate in sprint planning and development of user stories.
- Develop APIs and integrations with MuleSoft utilizing both Cloudhub and on-premise platforms.
- Led the integration team through a large migration project from Click to Salesforce Field Services.

Software Engineer III, M&T Bank November 2018 – October 2019
[Buffalo, NY]

- Collaborate with product owners to determine ESB requirements.
- Design reusable web services to meet the needs of the ESB, and design partner services to align vendor's product needs with ESB.

Software Engineer, PeopleScout November 2017 – November 2018
[Remote Position]

- MuleSoft API development & Java middleware development for RPO platform utilizing third party vendors for AI candidate sourcing, video interviewing, and candidate portal integrations.
- Own issues, troubleshoot, and work with vendor partners until ticket resolution.
- Manage and coordinate new client implementations with vendor partners.

Senior Systems Programmer/Analyst, Constellation Brands December 2016— November 2017
Application Engineer, Constellation Brands February 2011 – December 2016
[Victor, NY]

- Java Spring API development for internal and external consumers, persisted to PostgreSQL, hosted on Heroku and AWS with an emphasis on continuous integration and delivery. Delivered according to SLA with over 99.999% uptime. Worked closely with iOS development team to meet business requirements set by field sales enablement and marketing teams. Designed and maintained API RAML contracts on developer portal.
- Served as development lead for two successful Amazon Echo PoCs, utilizing internal and external APIs to meet requirements for sales team, and for consumers. Second phase of development scheduled for broader application of speech-based integration of APIs.
- Integrations development within MuleSoft and BizLink BizManager to facilitate marketing communications for SaaS providers, interface programming and EDI transformations.

Software Developer II, Siteworx June 2010 — January 2011
[Rochester, NY]

- Worked with a team of developers to implement websites and customize CMSes according to specifications set by UI/UX teams. Used a variety of platforms – Drupal, Tridion, Sitecore, as well as custom PHP sites built around customer APIs.

Developer, Blue Heron Consulting September 2008 — June 2010
[Rochester, NY]

- Analyzed functional and technical specifications and developed Oracle CC&B custom interfaces, BI Publisher reports, and associated database queries to support client requirements.
- Managed security, services, and hardware for the company-wide network – comprised of one dozen servers and 100 workstations; both local and remote.
- Created a project plan proposal for an open source VPN implementation that would better suit the growing company's needs. Successfully implemented and managed the project.
